

Fleet Logistics appoints Christophe Martinet as Country Head France

Fleet Logistics Group, Europe's largest independent fleet management company, has appointed Christophe Martinet as its new Country Head for France. Reporting to recently appointed CEO, Steffen Schick, he will be responsible for the continued development of fleet management services for existing and new clients throughout France.

Christophe Martinet is a specialist in the management, optimization and development of professional fleets of all sizes from two to more than 60,000 units, and has experience in working across different transport sectors, including motorbikes, cars, vans and heavy goods vehicles.

Prior to joining Fleet Logistics, he was with Vehiposte, the fleet management subsidiary of postal service company La Poste, based in Paris, for 13 years, most recently as Commercial Marketing and Communications Director.

Here, he was responsible for leading and organizing the management and business development of the company's services to the group and both the public and private sectors. Prior to joining Vehiposte, he was automotive Purchasing Manager at La Poste Group, with an annual budget of €300million.

Steffen Schick, CEO of Fleet Logistics Group, said: "We are delighted to welcome Christophe in our organization, given his deep expertise of the French fleet management market. He will be working closely with the Fleet Logistics France team to further expand its footprint and to continue serving clients with the highest level of operational quality."

About Fleet Logistics

Fleet Logistics currently has a contracted vehicle fleet of around 180.000 vehicles with a related cost base of around €2.5 billion on behalf of leading multi-national corporations. The company is jointly owned for 40% by TÜV SÜD Auto Service GmbH, a wholly owned subsidiary of TÜV SÜD AG, and for 60% by Volkswagen Financial Services AG.

Fleet Logistics has emerged in Europe as a unique, knowledge-based fleet organisation, offering expert and impartial advising and management services, ranging from fleet solutions (fleet cost, policy and practices benchmarking) to strategic procurement (supplier tendering, negotiation and selection) and ongoing supplier monitoring (continuing control on overall costs, suppliers' pricing, and service quality).

Fleet Logistics' support services enable clients to reduce costs, simplify administration, and achieve maximum effectiveness for their policies and operations.
